Mean scores of Grade 7 students by domain and strands, FSM, PILNA 2021

The average numeracy strand performance for grade seven students in Federated States of Micronesia is shown in Figure CNF7.3. There was little variation in the average scores of the numeracy strands, which shows that this grade seven cohort had consistent performance across the four strands. This also means that the overall numeracy score for this cohort was not disproportionately affected by any single strand's score.
