Mean scores of Year 4 students by domain and strands, RMI, PILNA 2021

The average numeracy strand performance for grade five students in Marshall Islands is shown in Figure CNF5.3. The scores in each of the numeracy strands were similar. This shows that the 2021 grade five cohort had consistent performance across all numeracy strands. This also means that the overall numeracy score for this grade five cohort – the average of the strand scores – was not disproportionately affected by any single strand's score.
