Figure CNF4.2

Year 4 Numeracy performance over time

Year	Year 4
2015	478.44
2018	478.99
2021	464.81

Mean performance of Year 4 students in numeracy, Tokelau, PILNA 2015, 2018 and 2021

Figure CNF4.2 shows the average numeracy scores of this group and of year four students in Tokelau in previous PILNA cycles. The score for Tokelau year four students in 2021 was lower than all previous PILNA cycles but the standard deviation was greater than all previous PILNA cycles. This means that the distribution of overall numeracy scores in 2021 was more spread out than in previous PILNA cycles. More analysis needs to be done to understand whether these differences in scores are statistically significant.

Standard deviation shows how close data points are to the average. A lower standard deviation means that data points are, overall, closer to the average; a higher standard deviation means that data points are, overall, further away from the average.
